

**Uncontained Engine Failures  
Implementation Plan  
For  
Disk Inspection Initiative**

**Statement of Work: (SE-84)**

All operators should conduct enhanced disk inspection to detect cracks and help prevent uncontained engine failures of high-energy rotating parts.

**Outcomes:**

Detection and removal of cracked engine disks, and reduction in the rate of uncontained engine failures.

**Outputs:**

Develop and implement enhanced inspection procedures.

**Performance Goals & Indicators for Outcomes/Outputs:**

Number of crack finds; rate of disk failures.

**Lead Organization for Coordination:**

ANE-100

**Impact on Non-FAR Part 121 or International Applications:**

Activity coordinated with international regulatory organizations.
