AIR TRAFFIC CONTROL POLICIES AND PROCEDURES

ALM
APPROACH AND
LANDING
MISALIGNMENT

GCOL, RI

SECTION I: SE OVERVIEW

Study Topic Overview Summary Throughout the National Airspace System (NAS), the risk for approach and landing misalignment (ALM) has been identified. This risk includes aircraft approaching or landing on a surface other than what they were cleared for. These other surfaces included the wrong runway, taxiway, or airport. While these events have typically been caught soon enough to prevent an adverse outcome, there have been high-profile events, including an event involving an approach to a taxiway on July 7, 2017, in San Francisco, California. This ultimately led CAST to charter the ALM Joint Safety Analysis and Implementation Team (JSAIT) to analyze misalignments and determine mitigations based on Aviation Safety Information Analysis and Sharing (ASIAS) data from sources such as Aviation Safety Action Program (ASAP) reports, Air Traffic Safety Action Program (ATSAP) reports, and Mandatory Occurrence Reports (MOR). CAST adopted four SEs as a result of the study, two of which are directed toward aircraft operators and original equipment manufacturers (OEM), while the remaining two are directed toward air traffic control (ATC). CAST also adopted one research and development (R&D) SE, which is directed toward aircraft operators and OEMs.

SE Objective

CAST recommends utilizing air traffic procedures and policies lessons learned and adapt these best practices.

Primary Risks

Mitigated Ground Collision (GCOL) and Runway Incursion (RI)

Action	Organization(s)	Strategy	Description	Due Date	
Action 1	FAA Air Traffic Organization (ATO)	Collaboration	Establish a working group for testing the expansion of the runway assignment plan.	2/29/2024	
	Comments: None				
Action 2	FAA ATO	Procedures	Develop procedures to ensure operable runway alignment equipment is utilized for visual approaches.	11/30/2024	
	Comments: None				

See section II of this SE for detailed action descriptions.

References: The detailed analysis in the ALM JSAIT Final Report is available through CAST.

TABLE OF CONTENTS

Section II: Detailed Action Information

SE 234 consists of two actions, which this section lays out in detail.

- Action 1 (FAA ATO, FAA AJI, FAA AJI, NATCA, Air Carrier Industry Associations)......PAGE 3
 Establish a working group for testing the expansion of the runway assignment plan

SECTION III: SUPPLEMENTAL INFORMATION

PAGE 5

This section contains the following additional information that may be of interest to implementers:

- Source Study
- Related Initiatives
- Total Cost/Resource Overview

SECTION IV: REVISION LOG

PAGE 6

This section provides a history of revisions to this SE.

SECTION II: DETAILED ACTION INFORMATION

Action 1: Establish a working group for testing the expansion of the runway assignment plan				
Primary Implementer FAA		FAA A	Air Traffic Organization (ATO)	
Action Objective Salt I		Salt L	olish a workgroup to identify airports with similar layouts and numbers of operations to Lake City International Airport (KSLC), Salt Lake City, Utah, for testing the expansion of the vay assignment plan.	
Action Timeline			w Time: 27 months o 1a—9 months o 1b—6 months o 1c—12 months	
	ne/Flow for Adopters	N/A		
CAST L	ead	FAA S	afety and Technical Training (AJI), National Air Traffic Controllers Association (NATCA)	
#	Organizatio	on(s)	Detailed Steps	
1 a	FAA ATO O of Termina Services (A FAA AJI, NA	JT),	Establish a collaborative workgroup to identify the existing best practices, such as the KSLC runway assignment plan, and a list of similar-size airports with similar operations for best practices implementation testing.	
1b	FAA AJT, FAA AJI NATCA		Create a template for applying the best practices at the identified airports. Identify what they did at air traffic facilities and air carriers. Include development of published approach guidance, like an instrument landing system (ILS) Precision Runway Monitor (PRM) instructions page.	
1c	FAA AJT, FAA AJI, NATCA		Communicate with similar-size airports and affected air carriers; provide results from KSLC runway assignment plan.	
Notes				

Note: See section III for detailed costs and resources.

STUDY TOPIC ALM APPROACH AND LANDING MISALIGNMENT

GCOL, RI

SECTION II: DETAILED ACTION INFORMATION

Action 2: Develop procedures to ensure operable runway alignment equipment is utilized for visual approaches

Primary Implementer		FAA A	AA Air Traffic Organization (ATO)		
ACTION UNIPCTIVE			Develop a method that ensures arrivals utilize the operable runway alignment equipment, such as an instrument landing system (ILS), when conducting visual approaches.		
Action Timeline			Flow Time: 36 months o 2a—12 months o 2b—24 months Due Date: 11/30/2024		
Timeline/Flow for Future Adopters		N/A			
CAST Lead		FAA S	safety and Technical Training (AJI), National Air Traffic Controllers Association (NATCA)		
#	Organizatio	on(s)	Detailed Steps		
2a	FAA AJI, FAA Missic Support (A FAA AJT, N	JV),	Establish a collaborative workgroup to develop a method that ensures arrivals utilize the operable runway alignment equipment, such as an instrument landing system (ILS), when conducting visual approaches.		
2b	2b FAA AJI, FAA AJV FAA AJT, NATCA		FAA ATO will provide methods to air traffic facilities that would ensure arrivals use the operable runway alignment equipment, such as an ILS, when conducting visual approaches. The air traffic facilities will then have the option to implement the practice to verify correct alignment to manage misalignment risk.		
Notes	1				

Note: See section III for detailed costs and resources.

CICTT RISK AREAS GCOL, RI

SECTION III: SUPPLEMENTAL INFORMATION

Source Study	Approach and Landi	ing Misalignment (ALM) Joint Safety Analysis and Implementation Team (JSAIT)			
Related Initiatives	None				
Total Cost ¹	\$14,375,000 No	te: For labor, 1 Full Time Equivalent (FTE) = \$250,000			
	Organization	Resources Needed			
Direct Resource Overview— Government	FAA Air Traffic Organization (ATO)	• 40 FTE			
	Organization	Resources Needed			
Direct Resource Overview— Industry	Air Carriers	 17.5 (0.25 FTE per air carrier, per airport to evaluate impact of new procedures) 			
Indirect Resource	•	dentified in this section are not expected to incur direct costs associated with E, but they may incur indirect costs within their normal line of work.			
Overview	Organization	Description			
	Air carriers	Projections above assume individual air carriers will implement appropriate changes as part of their regular 10-9 chart update cycles.			
	Air carriers	Project requires air carrier data analysis to identify the airports for implementation.

SECTION IV: REVISION LOG

Major revisions (whole numbers) represent CAST-approved changes to SE language. Minor revisions (decimals) represent minor changes to target dates or completion notes that do not affect implementer actions.

Revision	Date	Description
0.3	08/04/2022	Administrative change to clarify description of Action 2 in Section 1 and the corresponding title in Section 2.
0.2	03/24/2022	Administrative change to correct Strategy field in— Action 1 in Section 1. Action 2 in Section 1.
0.1	12/20/2021	Administrative change to correct due date inconsistency in Action 1.
Original	12/2/2021	Start date based on CAST adoption.
