Surveyors trained to use the same approach in a consistent manner

The screenshot displays the CESATK-Demo Version software interface. On the left, a tree map organizes components under 'SMS_STANDARDS' and 'SMS_CAN'. The right pane shows the details for 'Level 5'.

Standard(s) Editor | **Control Demo**

Left Panel (Tree Map):

- SMS_STANDARDS
 - SMS_CAN
 - SAFETY MANAGEMENT SYSTEM
 - SAFETY MANAGEMENT PLAN
 - Performance Measurement
 - Management Review
 - Safety Policy
 - Non-Punitive Safety Reporting Policy
 - Roles, Responsibility & Employee Involvement
 - Communication
 - DOCUMENTATION
 - SAFETY OVERSIGHT
 - TRAINING
 - QUALITY ASSURANCE
 - EMERGENCY PREPAREDNESS
 - (Scoring): SMS_CAN
 - Level 1
 - Level 2
 - Level 3
 - Level 4
 - Level 5

Right Panel (Details for Level 5):

Name: Level 5

Description: A score of (5) is considered to meet all of the criteria for an award level of (4) plus all of the additional requirements listed under the criteria for that element. To achieve an award level of (5), an organisation would have to meet the regulatory requirements as well as demonstrate industry best practices at a very high level. The policy is clearly visible to all personnel and particularly throughout the safety-critical areas of the organisation. The policy is included in key documentation and communication media. Senior managers clearly articulate the importance of safety when addressing company personnel.

Comment:

Score Weight: 5 **Criteria Compliance:** 5

Buttons: LoadData, SaveData, Export, Create/Select Standard, Update Database, Create Copy, Expand All, Validate.

Status Bar: FPS 117,0; Avg. FPS 140,2

Surveyors trained to use the same approach in a consistent manner

The screenshot shows the 'CreateSurvey' application window. On the left, there is a table titled 'Select a Base Standard' with a dropdown menu set to 'SMS_CAN'. The table has columns: Survey_NAME, SEQ, CREATION, MODIFICATION, and COMM. The first two rows are 'SMS_CAN.1' and 'SMS_CAN.2'. Below the table is a large greyed-out area. On the right, there is a 'Survey Description' form with fields for Survey NAME, SEQ, CREATION, MODIFICATION, and COMMENTS. The Survey NAME field contains 'SMS_CAN.1', SEQ contains '1', CREATION contains '25 ianuarie 2009', MODIFICATION contains '14 septembrie 2009', and COMMENTS contains 'The Transport Canada Approach base standard'. There are 'OK' and 'Cancel' buttons at the top right of the form.

	Survey_NAME	SEQ	CREATION	MODIFICATION	COMM
▶	SMS_CAN.1	1	25.01.2009 22:26	14.09.2009 22:26	The Tra
	SMS_CAN.2	2	22.03.2009 19:55	22.03.2009 19:55

Define your own survey "standard" based on what you are going to survey : SMS, OPS Room, Equipment , etc

Flexible Standard structure to enable different Survey types and complexity in definition

Component	Node containing other components or children element nodes
Element	Node containing question nodes and a single element scoring node
Question	Node that contains Criteria nodes
Global Scoring	Node that is unique for each standard and contains global criteria
Global criterion	Child node of global scoring and element scoring nodes which are used to compute the score and contain element criteria nodes
Element Scoring	Unique child node of an element node that contains element criteria nodes
Element criterion	Node that appears under the Global Criteria nodes

Reports: Web-style predefined dynamic reports side-by-side surveys based on standard selection for comparison automatic scoring computation

User requirements to Functional requirements mapping

Essential Requirements

- Flexibility
- User friendliness
- Versatility
- Adaptability
- Performance
- Cost effectiveness
- Portability

Functional Requirements

- Modularity
- Centered around a relational database
- Efficient HMI
- Open interfaces: e.g. XML
- Interface for easy exchange of data

CESATK Architecture

- Human Machine Interfaces: allows a human operator to interact with the business applications layer.
- Data processing layer: provides the core functionality, providing HMIs with services and data.
- Database layer: provides access through queries to the relational database.
- Hardware & Operative System: represents the physical world (not shown on the diagram).
